

Chemini Website - Project Structure

```
chemini-website/  
├── index.html  
├── css/  
│   └── styles.css  
├── js/  
│   └── main.js  
├── assets/  
│   └── images/  
│       └── (placeholder for future images)  
├── README.md  
└── .gitignore
```

Files Overview

- **index.html**: Main HTML structure
- **css/styles.css**: All custom styles and CSS
- **js/main.js**: All JavaScript functionality
- **assets/images/**: Directory for local images (currently using external URLs)
- **README.md**: Project documentation
- **.gitignore**: Git ignore file for deployment

External Dependencies

The website uses the following CDN resources:

- Tailwind CSS
- Chart.js
- Google Fonts (Inter)
- Supabase JavaScript client
- tsParticles library

Deployment Ready

This structure is ready for deployment on:

- GitHub Pages
- Netlify
- Vercel
- Any static hosting service

Configuration Notes

- Update Supabase credentials in `js/main.js`
- All external image URLs are preserved
- Mobile-responsive design included
- All interactive features functional
